

To install, go to the Magento root directory and run the following two commands that add access to the private repository and install the extension.

```
$ composer config
repositories.engine23-shopperapproved composer
https://746m4HgKHcYxPTpB:vuVrpt3SKVFFCNhJ-
cAkQYXY@packages.engine23.com/ShopperApproved/
```

```
$ composer require engine23/module-shopper-approved
```

When deploying, you will also need to run:

```
$ composer update engine23/module-shopper-approved
```

You can find the Magento 2 specific documentation on composer here:

<https://devdocs.magento.com/guides/v2.4/install-gde/composer.html>

Then follow these steps to enable and register the extension with your Magento site.

1. Navigate to the root directory of your Magento site installation.

2. Place your site into maintenance mode:

```
$ bin/magento maintenance:enable
```

3. Enable the Shopper Approved® module:

```
$ bin/magento module:enable Engine23_ShopperApproved
```

4. Run the Magento module data upgrade:

```
$ bin/magento setup:upgrade
```

5. Run the Magento DI compilation:

```
$ bin/magento setup:di:compile
```

6. Run the Magento static content deployment:

```
$ bin/magento setup:static-content:deploy
```

7. Flush the Magento cache:

```
$ bin/magento cache:flush
```

8. Take your site out of maintenance mode:

```
$ bin/magento maintenance:disable
```

The Shopper Approved® extension is now installed and ready to be configured in the **Stores > Configuration > Shopper Approved®** area of your Magento site admin.
